**[STIPULATED] ORDER RE:
DISCOVERY OF ELECTRONICALLY
STORED INFORMATION**

Judge: Hon. James Donato

1. PURPOSE

This Order will govern discovery of electronically stored information (“ESI”) in this case as a supplement to the Federal Rules of Civil Procedure, this Court’s Guidelines for the Discovery of Electronically Stored Information, and any other applicable orders and rules.

2. COOPERATION

The parties are aware of the importance the Court places on cooperation and commit to cooperate in good faith throughout the matter consistent with this Court's Guidelines for the Discovery of ESI.

3. LIAISON

The parties will identify liaisons to each other who are and will be knowledgeable about and responsible for discussing their respective ESI. Each e-discovery liaison will be, or have access to those who are, knowledgeable about the technical aspects of e-discovery, including the location, nature, accessibility, format, collection, search methodologies, and production of ESI in this matter. The parties will rely on the liaisons, as needed, to confer about ESI and to help resolve disputes without court intervention.

4. PRESERVATION

To reduce the costs and burdens of preservation and to ensure proper ESI is preserved, the parties represent that:

a. These data sources are not reasonably accessible because of undue burden or cost pursuant to Fed. R. Civ. P. 26(b)(2)(B) and ESI from these sources will be preserved pursuant to normal business retention, but not searched, reviewed, or produced, except for good cause shown:

- 1) backup systems and/or tapes used for disaster recovery purposes only;
- 2) systems, server and network logs; and
- 3) systems no longer in use that cannot be accessed.
- 4) deleted, slack space, fragmented, or other data accessible only by forensics;

1 5) random access memory (RAM), temporary files, or other ephemeral data that
 2 are difficult to preserve without disabling the operating system;

3 6) on-line access data such as temporary internet files, history, cache, and
 4 cookies;

5 7) automatically saved interim versions of documents and emails (for the
 6 avoidance of doubt, this provision does not apply to any final versions of
 7 documents and emails whether saved manually or automatically);

8 8) dynamic fields of databases or log files that are not retained in the usual
 9 course of business; and

10 9) data in metadata fields that are frequently updated automatically, such as last
 11 opened dates.

14 **5. SEARCH**

15 a) The parties agree that in responding to an initial Fed. R. Civ. P. 34 request, or
 16 earlier if appropriate, they will meet and confer about methods to search ESI in order to identify
 17 ESI that is subject to production in discovery and filter out ESI that is not subject to discovery.

18 b) Deduplication: If exact duplicate documents reside within a Party's ESI data set,
 19 the Party shall produce only a single copy of a responsive document. "Exact duplicate" shall
 20 mean documents with exact Hash Value matches determined by MD5, SHA-1, or SHA26
 21 algorithms. Hard copy documents shall not be eliminated as duplicates of responsive ESI nor of
 22 other responsive hard copy documents.

23 The parties shall deduplicate exact duplicates of ESI horizontally (i.e., across the entire
 24 collection and across custodians). Deduplication must be done only at the family level (i.e., if
 25 there are identical child documents that have unique parents, they are not duplicates; an
 26 attachment to a document is not a duplicate of the same document maintained as a standalone
 27 document). An email that includes content in the BCC or other blind copy field shall not be

1 treated as a duplicate of an email that does not include content in the BCC or other blind copy
 2 field, even if all remaining content in the email is identical. Exact duplicates of emails retrieved
 3 from different storage locations (i.e. desktop vs. laptop vs. smart phone) shall not be considered
 4 unique based solely on the originating storage location.

5 The custodian that produced the production copy of the duplicate document and all
 6 custodians who were in possession of the deduplicated document shall be identified in the
 7 “Custodian,” and “Duplicate Custodian” fields of the copy of the single record that is
 8 produced.

9 Multiple custodians in the “Duplicate Custodians” field shall be separated by
 10 semicolons. If processing and production is done on a rolling basis, an updated Duplicate
 11 Custodians field with additional values shall be provided in an overlay. The producing party
 12 shall identify whether the overlay replaces previously produced fields for a file or supplement
 13 them.

14 c) Each party will use its best efforts to filter out common system files and
 15 application executable files by using a commercially reasonable hash identification process.
 16 Hash values that may be filtered out during this process are located in the National Software
 17 Reference Library (“NSRL”) NIST hash set list. Additional culling of file types based on file
 18 header information may include, but are not limited to: Application Package File, Backup Files,
 19 Batch Files, Binary Disc Image, C++ File Formats, Cascading Style Sheet, Configuration File,
 20 Database File, Dictionary Files, Dynamic Link Library, Event Log Files, Executable Files,
 21 Hypertext Cascading Stylesheet, Java Archive Files, JavaScript files, JavaScript Source Code
 22 and Class Files, Macintosh Resource Fork Files, Package Manager Files, Program Files,
 23 Program Installers, Python Script Files, Shell Script Files, System or Temporary Files,
 24 Thumbnail Cache Files, Troff Files, TrueType Font Files, Windows Cabinet File, Windows
 25 Command Files, Windows File Shortcut, Windows Help Files, Windows Metafiles and
 26 Enhanced Metafiles, Windows Spool Files, and Windows System File.

6. PRODUCTION FORMATS

The parties agree to produce documents in the formats described in Appendix 1 to this Order. If particular documents warrant a different format, the parties will cooperate and meet and confer as needed to arrange for the mutually acceptable production of such documents. The parties agree not to degrade the searchability of documents as part of the document production process.

7. PHASING

When a party propounds discovery requests pursuant to Fed. R. Civ. P. 34, the parties agree to meet and confer regarding the phasing and prioritization of productions.

8. DOCUMENTS PROTECTED FROM DISCOVERY

a) Pursuant to Fed. R. Evid. 502(d), the production of a privileged or work-product-protected document is not a waiver of privilege or protection from discovery in this case or in any other federal or state proceeding as provided in the concurrently filed [Stipulated] Protective Order For Litigation Involving Highly Sensitive Confidential Information and/or Trade Secrets in the above-captioned actions, except as provided herein. When a Receiving Party uses a Document in an Expert Report, Court filing in this action, or a deposition (a “Used Document”), and the Producing Party does not claw back that Used Document within 30 days of use, that Used Document shall not be eligible for claw back pursuant to this Order.

b) Communications concerning the litigation involving trial counsel that post-date the filing of the first-filed complaint need not be placed on a privilege log.

c) The parties agree to meet and confer to discuss reasonable proposals regarding the content, format, timing and phasing of the exchanging of privilege logs, and reach agreement on these matters by no later than December 18, 2020. All privilege logs will be exchanged promptly after the Court ordered completion date for party document production.

d) Activities undertaken in compliance with the duty to preserve information are protected from discovery under Fed. R. Civ. P. 26(b)(3)(A) and (B), except for good cause shown.

1
2 e) The parties do not waive any objections to the production, discoverability,
admissibility, protection or confidentiality of documents and ESI.
3

4 **9. MODIFICATION**

5 This Stipulated Order may be modified by a Stipulated Order of the parties or by the Court
6 for good cause shown. Any such modified Stipulated Order will be titled sequentially as follows,
7 "First Modified Stipulated Order re: Discovery of Electronically Stored Information for Standard
8 Litigation," and each modified Stipulated Order will supersede the previous Stipulated Order.

1

APPENDIX 1
PRODUCTION FORMAT AND METADATA

2

3

1. **Production Components.** Productions shall include single page TIFFs, color JPGs (as described below), Native Files (as described below), Text Files, an ASCII delimited metadata file (DAT) and an image load file that can be loaded into commercially acceptable production software (e.g., Concordance).

4

2. **Image Load File** shall contain the following comma-delimited fields: BEGBATES, VOLUME, IMAGE FILE PATH, DOCUMENT BREAK, FOLDER BREAK, BOX BREAK, PAGE COUNT.

5

3. **Metadata Fields and Metadata File.** Each of the metadata and coding fields set forth below that can be extracted shall be produced for each document. The parties are not obligated to populate manually any of the fields below if such fields cannot be extracted from a document, with the exception of the following: BEGBATES, ENDBATES, BEGATTACH, ENDATTACH, PAGE COUNT, NATIVELINK, TEXTLINK, PRODVOL, CUSTODIAN, ALL CUSTODIANS, DOCUMENT TYPE, TIMEZONE, CONFIDENTIALITY, and REDACTED. The metadata file shall be delimited according to the following characters:

14

- 15 • Delimiter = ¶ (ASCII:020)
- 16 • Text-Qualifier = ¢ (ASCII:254)
- 17 • New Line = ® (ASCII:174)
- 18 • Multi-value delimiter - ; (ASCII Code 059)

19

Field	Definition	Doc Type
CUSTODIAN	Name of person from where Documents/files were collected or, in the case of non-human sources, an identifier that indicates a non-custodial file.	All
ALL_CUSTODIANS	The Custodian value of the Document as well as the Custodian value for all copies of the Document that were removed as a result of de-duplication.	All
BEGBATES	Beginning Bates Number (production number)	All
ENDBATES	Ending Bates Number (production number)	All
BEGATTACH	First Bates number of family range (i.e., Bates number of the first page of the parent Document)	All
ENDATTACH	Last Bates number of family range (i.e., Bates number of the last page of the last attachment or, if no attachments, the Document itself)	All
PAGE COUNT	Number of pages in the Document	All

1	APPLICATION	Commonly associated application for the specified file type.	All
2	NATIVE FILE LINK	The file path for Documents provided in Native Format	All
3	TEXTPATH	File path for OCR or Extracted Text files	All
4	PARENT DATE	Date of the Parent Document mm/dd/yyyy	All
5	PARENT TIME	Time of the Parent Document hh:mm:ss	All
6	FROM	Sender	E-mail
7	TO	Recipient	E-mail
8	CC	Additional Recipients	E-mail
9	BCC	Blind Additional Recipients	E-mail
10	SUBJECT	Subject line of e-mail	E-mail
11	DATESENT	mm/dd/yyyy	E-mail
12	TIMESENT	hh:mm:ss	E-mail
13	HASHVALUE	Hash value (e.g., MD5 or SHA-1)	All
14	FILENAME	Original file name at the point of collection	E-Document
15	FILEEXT	Original file extension at the point of collection	E-Document
16	TITLE	Title of document or title field extracted from the metadata of non-email ESI	E-Document
17	AUTHOR	Creator of a Document	E-Document
18	DATE CREATED	mm/dd/yyyy	E-Document
19	TIME CREATED	hh:mm:ss	E-Document
20	DATE MODIFIED	mm/dd/yyyy	E-Document
21	TIME MODIFIED	hh:mm:ss	E-Document
22	DOCUMENT TYPE	Descriptor for the type of Document: "E-Document" for electronic Documents not attached to e-mails; "E-mail" for all e-mails; "E-attachment" for files that were attachments to e-mails; and "Hard Copy" for Hard-Copy Documents.	All
23	REDACTED	"Yes" for redacted Documents; "No" for un-redacted Documents.	All
24	PRODVOL	Name of media that data was produced on.	All
25	CONFIDENTIALITY	Confidentiality level if assigned pursuant to any applicable Protective Order or stipulation.	All
26	TIMEZONE	Time zone of data used during processing of data.	All
27	SOURCE	The producing party	All
28	ATTACHIDS	The IDs of the documents that are attached to the produced document	All
29	PARENT ID	Indicates the parent ID for an attachment or embedded document. The parent document ID field should be set for all attachments (including attachments that are emails) but should not be set for parents	E-documents

1	MESSAGEID	The message ID of an email or other type of electronic message	E-documents
2	FILESIZE	The size of the file.	E-documents; E-Attachments

3 4. **Time Zone.** Each Party's ESI should be processed using a consistent Time Zone for all
4 data. The Party shall share the Time Zone selected for processing of its data with the other
5 Party and populate the TimeZone metadata field.

6 5. **Encrypted Data.** To the extent documents were encrypted, the producing party shall
7 make reasonable efforts to decrypt the documents prior to electronic search, review, and
8 production unless doing so is unduly burdensome and/or disproportionate to the needs of
9 the case, in which case the parties shall meet and confer regarding the burden and
10 possibility of shifting costs to the requesting party pursuant to Rule 26. If there are
11 potentially responsive documents that the producing party has been unable, after
12 reasonable efforts, to decrypt, the parties shall meet and confer.

13 6. **Password Protected Files.** To the extent documents were password protected at the time
14 of collection, prior to electronic search, review, and production, the producing party shall
15 take reasonable efforts to remove the password protection unless doing so is unduly
16 burdensome and/or disproportionate to the needs of the case, in which case the parties
17 shall meet and confer regarding the burden and possibility of shifting costs to the
18 requesting party pursuant to Rule 26. If there are potentially responsive password
19 protected documents, the password for which the producing party has been unable, after
20 reasonable efforts, to locate, the parties shall meet and confer. If a party believes that
21 removing password protection is unduly burdensome, the Parties shall meet and confer.

22 7. **Embedded Objects.** Non-image objects embedded in documents shall, when possible, be
23 extracted and produced as separate documents. The producing party will make reasonable
24 and good faith efforts to treat such extracted embedded documents like attachments to the
25 document. Embedded documents will be produced following the parent with a continuous
26 Bates range.

27 8. **Compressed and Container Files.** Compressed and container file types (e.g., .ZIP,
28 .RAR, etc.) shall be decompressed to ensure that a compressed file within a compressed
file are decompressed into the lowest possible compression to ensure all files are searched
and produced as separate records. Emails and their attachments shall be extracted
separately and shall be produced with the family relationship intact via the BegAttach and
EndAttach fields identified in Appendix A.

29 9. **Hyperlinked Files.** If a Receiving Party identifies a hyperlinked file that it reasonably
30 believes to be responsive and seeks its production, that Party shall identify by Bates

number the document in which the hyperlinked file appears and the Producing Party will produce such file if responsive and to the extent not unduly burdensome.

10. If a Document is more than one page, the unitization of the Document and any attachments and/or affixed notes shall be maintained as they existed in the original Document.
11. **TIFFs.** Documents that exist only in hard copy format shall be scanned and produced as TIFFs. Unless excepted below, documents that exist as ESI shall be converted and produced as TIFFs. Unless excepted below, single page Group IV TIFFs should be provided, at least 300 dots per inch (dpi) for all documents. TIFFs may be produced in black & white, except that a party may request color JPGs of other documents where color is reasonably necessary to their comprehension or use, and such request shall not unreasonably be denied. Each image shall be named according to a unique corresponding Bates number associated with the document. Each image shall be branded according to the Bates number and the agreed upon confidentiality designation. Original document orientation should be maintained (i.e., portrait to portrait and landscape to landscape). To the extent available without undue burden, all documents that contain comments, deletions and revision marks (including the identity of the person making the deletion or revision and the date and time thereof), speaker notes or other user-entered data that the source application can display to the user will be processed such that all that data is visible in the Image File. All hidden text, columns, rows, and worksheets will be expanded, extracted, and rendered in the TIFF file. The Producing Party will instruct its vendor to force off Auto Date so that any ESI converted to TIFF maintains any date/time shown in a document as it was last saved by the custodian or end user, not the date of collection or processing.
12. **Text Files.** A single multi-page text file shall be provided for each document, and the filename should match the first bates number of the document. Text must be extracted directly from the native electronic file of ESI unless the document requires redaction, is a scanned hardcopy document, is an image file, or is any other native electronic file that does not contain text to extract (e.g., non-searchable PDFs), in which case searchable text shall be created using OCR. Extracted text shall not contain the Bates number or Confidentiality Designation. A commercially acceptable technology for optical character recognition “OCR” shall be used. All documents shall be produced with a link in the TextLink field.
13. **Image Load Files / Data Load Files.** Each TIFF in a production must be referenced in the corresponding image load file. The total number of documents referenced in a production’s data load file should match the total number of designated document breaks in the Image Load file(s) in the production. The total number of pages referenced in a production’s image load file should match the total number of TIFF files in the

1 production. The total number of documents in a production should match the total
 2 number of records in the data load file.

3 **14. Bates Numbering.** All images must be assigned a unique Bates number that is sequential
 4 within a given document and across the production sets.

5 **15. Confidentiality Designation.** Responsive documents in TIFF format will be stamped
 6 with the appropriate confidentiality designations in accordance with the Protective Order
 7 in this matter. Each responsive document produced in native format will have its
 8 confidentiality designation identified in the filename of the native file.

9 **16. Redaction Of Information.** If documents are produced with redactions, an electronic
 10 copy of the original, unredacted document shall be securely preserved in such a manner so
 11 as to preserve without modification, alteration or addition the content of such document
 12 including any metadata therein.

13 **17. Native Files.** Spreadsheets (e.g., MS Excel, Google Sheets), delimited text files (e.g.
 14 comma-separated value (.csv) files and tab-separated value (.tsv) files), audio, and video
 15 files shall be produced in either their native format or, for Google Sheets, MS Excel. TIFF
 16 images need not be produced unless the files have been redacted, in which instance such
 17 files shall be produced in TIFF with OCR Text Files. A TIFF placeholder indicating that
 18 the document was provided in native format should accompany the native file. If a file has
 19 been redacted, TIFF images and OCR text of the redacted document will suffice in lieu of
 20 a native file and extracted text. Native files shall have a file name that includes the Bates
 21 number and Confidentiality Designation. Any party printing the native file for use in this
 22 matter shall append and use the placeholder TIFF as a cover sheet to the native file at all
 23 times.

24 **18. Proprietary Files.** To the extent a response to discovery requires production of ESI
 25 accessible only through proprietary software, the parties should continue to preserve each
 26 version of such information. The parties shall meet and confer to finalize the appropriate
 27 production format.

28 **19. Family Groups.** An email, instant message, or document with non-image embedded
 1 objects and its attachments constitute a family group. Parent-child relationships (the
 2 association between an email, instant message, or document with non-image embedded
 3 objects and its attachments) will be preserved through the production of an appropriate
 4 metadata field. If any member of a family group is determined to be responsive to a
 5 party's document requests, then all members of that group must also be considered as
 6 responsive.

1 20. **Instant Messages.** To the extent instant messages (e.g., Slack, Jabber, Google Chat) or
 2 text messages (e.g., SMS, iMessage) are produced for any custodian, a party shall take
 3 reasonable steps to produce such messages in a manner that preserves the context of the
 4 communication by producing messages occurring before or after a given message
 5 pertaining to the same topic.

6 21. **Re-productions.** Notwithstanding any provisions to the contrary, documents that are
 7 reproduced in whole or in part from the production files of another litigation, arbitration,
 8 government inquiry, or other matter may be produced in the same manner and form as
 9 originally produced in the other matter, provided however that a party will re-produce
 10 documents in a different format for good cause shown. This provision does not waive the
 11 right of a party to object to any requests for reproduction of production files from another
 12 litigation, arbitration, government inquiry, or other matter.

13 22. **Replacement Productions.** Any replacement production will be transmitted with a cover
 14 letter or email to identify the production as a replacement and cross-reference the BegDoc
 15 and EndDoc of the documents being replaced. Replacement productions shall include load
 16 files necessary to link the replacement file to other previously produced document family
 17 members. Where the replacement document occupies more pages than an original
 18 placeholder image, the Producing Party shall apply an appropriate numerical suffix to the
 19 Bates number of the file (e.g., ABC000123.001 to ABC000123.005. If the replacement
 20 production is being transmitted by physical media, the media shall include the phrase
 21 “Replacement Production.”

22 23. **Production Media.** Documents shall be encrypted and produced on an FTP site or
 23 electronic media (hard drive, thumb drive, DVD or CD) (“Production Media”). Each
 24 piece of Production Media shall identify a production number corresponding to the
 25 production volume (e.g., “VOL001,” “VOL002”), as well as the volume of the material in
 26 that production (e.g. “-001,” “-002”). Each piece of Production Media shall also identify:
 27 (1) the producing party’s name; (2) the production date; (3) the Bates Number range of the
 28 materials contained on the Production Media; and (4) the set(s) of requests for production
 29 for which the documents are being produced.
